## Pattern Printing

— Problem Description

Decode the logic and print the Pattern that corresponds to given input.

If N= 3

then pattern will be :

```
10203010011012
**4050809
****607
```

If N= 4

then pattern will be:

```
1020304017018019020
**50607014015016
****809012013
*****10011
```

— Constraints

2 <= N <= 100

— Input Format

- Input Format
  - Single Integer N
- Output
  - The pattern*
- Test Case
- Explanation
  - Example 1
    - Input
      - 3
    - Output
      - 10203010011012
      - \*\*4050809
      - \*\*\*\*607
  - Example 2
    - Input
      - 4
    - Output
      - 1020304017018019020
